

ENVIRONMENTAL POLICY

Dear Sir or Madam,

We are pleased to welcome you to our establishment.
Since its creation in 1986, we have given central importance to respect for the environment.

For us, for you and for future generations, we have set up our campsite to minimize its environmental impact as much as possible.

Thus,

- We have installed thermal solar panels on our two sanitary blocks to produce part of the domestic hot water.
- We have installed water-saving devices on all taps so as not to exhaust the resource, all our urinals work without flushing
- We mulch the flowerbeds in front of reception to reduce watering
- We have installed 2 insect hotels to promote biodiversity
- We replace each light bulb with an energy-saving LED bulb and have already equipped more than 90% of our lighting,
- We have set up selective sorting for packaging, glass, cardboard, green waste and batteries, and we also collect dry bread for the animals
- We have installed a fountain composter to treat bio-waste and transform it into compost for our green spaces
- Our rentals are equipped with a basket dedicated to transporting recyclables to the voluntary drop-off point
- We read our water and electricity meters every month to better manage consumption,
- We offer products from the organic and local agriculture
- Our green spaces are maintained without pesticides or herbicides and are watered sparingly. We use a "mulching" mower that shreds the grass and leaves it in place.
- We equip all our rentals with 2 VTCs in order to provide customers with a means of gentle mobility
- We have set up, in season, a bicycle rental

Thank you for participating with us in these efforts, nature and the planet too, will thank you.

The Management.
